

**DIRECT ENERGY MAKE ME GREEN  
NATIONAL WIND 2020 PRODUCT CONTENT LABEL**

Make Me Green is a Renewable Energy Certificate (REC) product and does not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information, see [www.green-e.org/rec](http://www.green-e.org/rec).

Make Me Green is sold in blocks of 1 kilowatt-hour (kWh) or matches the contracted percentage of your electricity usage. In 2019, Make Me Green National Wind was made up of the following renewable resources.

Green-e Energy Certified New <sup>1</sup> Renewables in Make Me Green REC Plan	Historical 2019 <sup>2</sup>		Prospective 2020 <sup>3</sup>	
	Percentage	Generation Location	Percentage	Generation Location
-Wind	<b>14.7%</b> <b>85.3%</b>	North Dekota Texas	<b>100%</b>	Texas
Total Green-e Energy Certified New Renewables	<b>100%</b>		<b>100%</b>	
<b>Total</b>	<b>100%</b>		<b>100%</b>	

1. New Renewables come from generation facilities that first began commercial operation in the last 15 years.
2. These figures reflect the resource mix of the RECs delivered to Make Me Green's customers in 2019.
3. These figures reflect the power that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you the actual resource mix of the electricity you purchased during the preceding year.

For comparison, the current average mix of resources supplying the United States includes: Natural Gas (33.8%), Coal (30.4%), Nuclear (19.7%), Renewables (8.4%), Hydroelectric (6.5%), Petroleum (0.6%), and Other (.6%). This resource mix is for 2016 as detailed by the U.S. EIA [<http://www.eia.gov/tools/faqs/faq.cfm?id=427&t=3>]
